

## Easter Holiday Homework

### Boaty McBoatface Boat Making Challenge.

In our Science topic, we are learning about forces including water resistance. Over the Easter holidays, I would like you to design and make a junk model boat which is as **stream-lined** as possible. It can be made out of any material and can be any size, but it will need to be blown across the swimming pool (with a hand held fan!). We will test each boat after Easter to see which is the fastest. You can work on your own or with a friend or two! Obviously it would be great to have as many boats to test as possible, but this is not compulsory homework. The fastest boat will win a magnificent prize (yet to be decided)!

**FIVE  
Homemade  
Boats**
